Schedule 1

Statement of Work
for Transformational Services
Intelligent Document Data Extraction for Subscription Onboarding

SOW - UC - 11(2026-01)

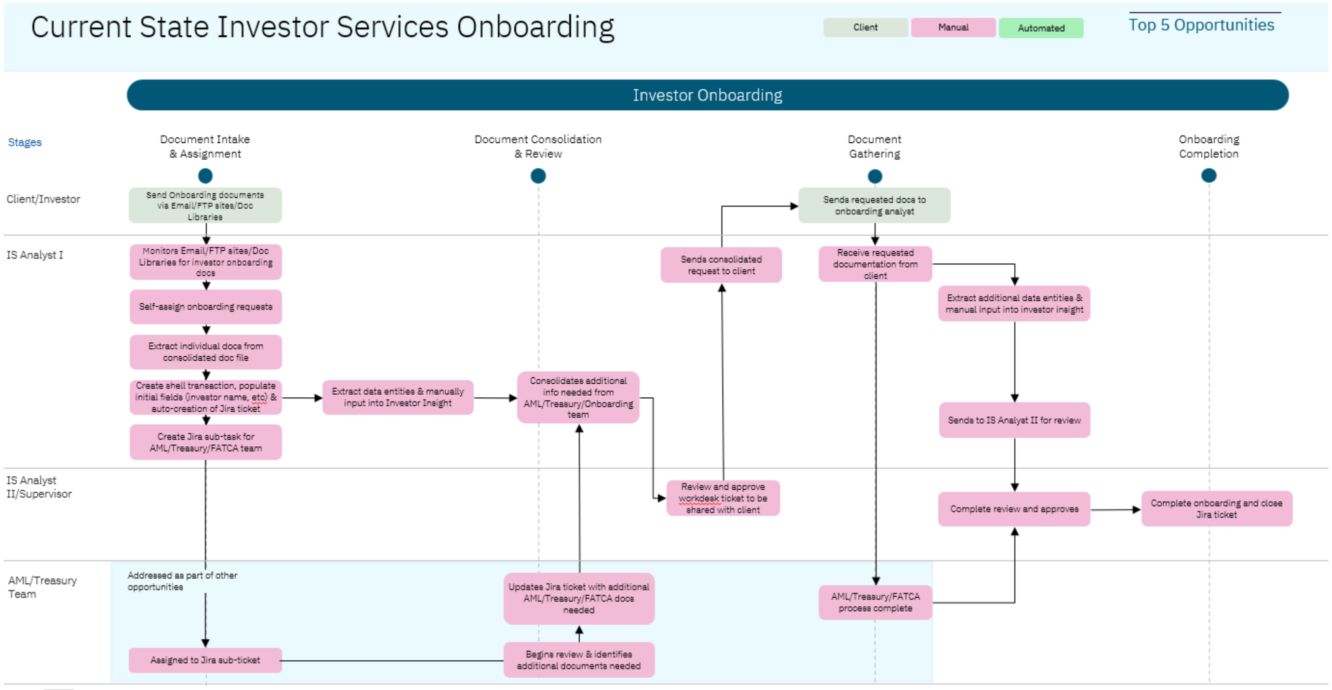
Scope

Vendor will design, build and test in the development environment set forth herein and in the Implementation Plan and subsequently deploy into SEI's pre-production environment defined in the Implementation plan, an AI-powered solution for Investor Services that will eliminate manual effort spent today for Subscription Onboarding for Investors ("In-Scope Processes") and eliminate time spent by SEI resources by ingesting documents, review documents, extract key fields from PDFs/scans/handwritten forms to key into Investor Insight via API/RPA with human-in-the-loop for validation as required (the "Deliverable"). The Solution will retrieve onboarding documents received via email, FTP sites, and other shared repositories. The Solution will classify documents (as required), extract appropriate data entities required to be extracted from the documents and will integrate with Investor Insight (for data entry of relevant fields for onboarding) and JIRA (for workflow sub-task creation and tracking). The documents will be stored in a location agreed with SEI. The Solution will also enable faster Level 2 review of the Level 1 data entry and will be designed to reduce time spent by SEI resources performing onboarding activities as described in Appendix A to this schedule 1.

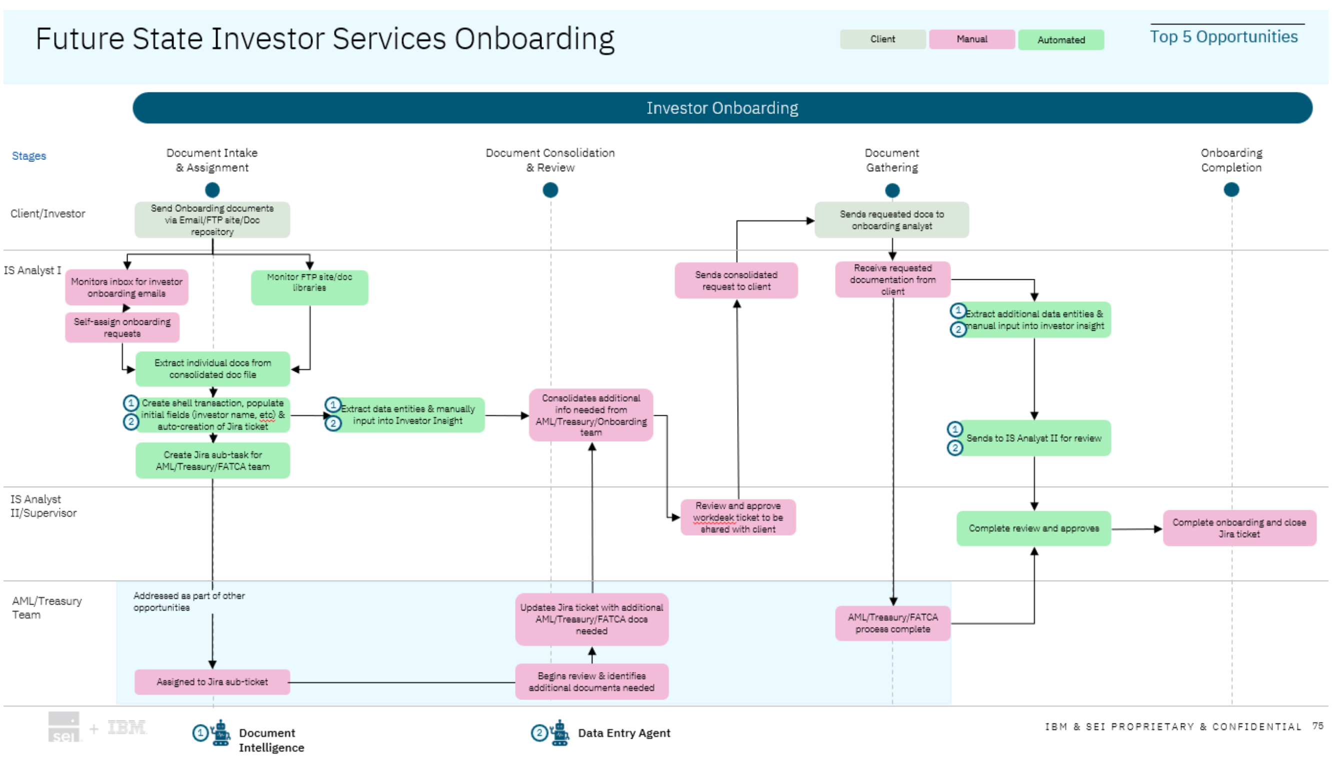
For the purposes of this SOW, the scope will be focused on processes performed in the US. Dublin processes will be picked up as a Change Request (CR) as required. The scope includes Initial Onboarding and Additional Onboarding and does not include Maintenance Requests.

Documents in scope for the sub onboarding process are Sub Docs, SIF Docs, and Tax Documents. Other documents such as Proof of Address, AML Questionnaire, Photo ID etc. will not be in scope of UC-11 and may be picked as part of other opportunities such as Wire instructions set-up, AML processes etc.

Below are initial views of Current State and Target State process flows for Onboarding. These may be further updated during deep-dive design workshops (as required).

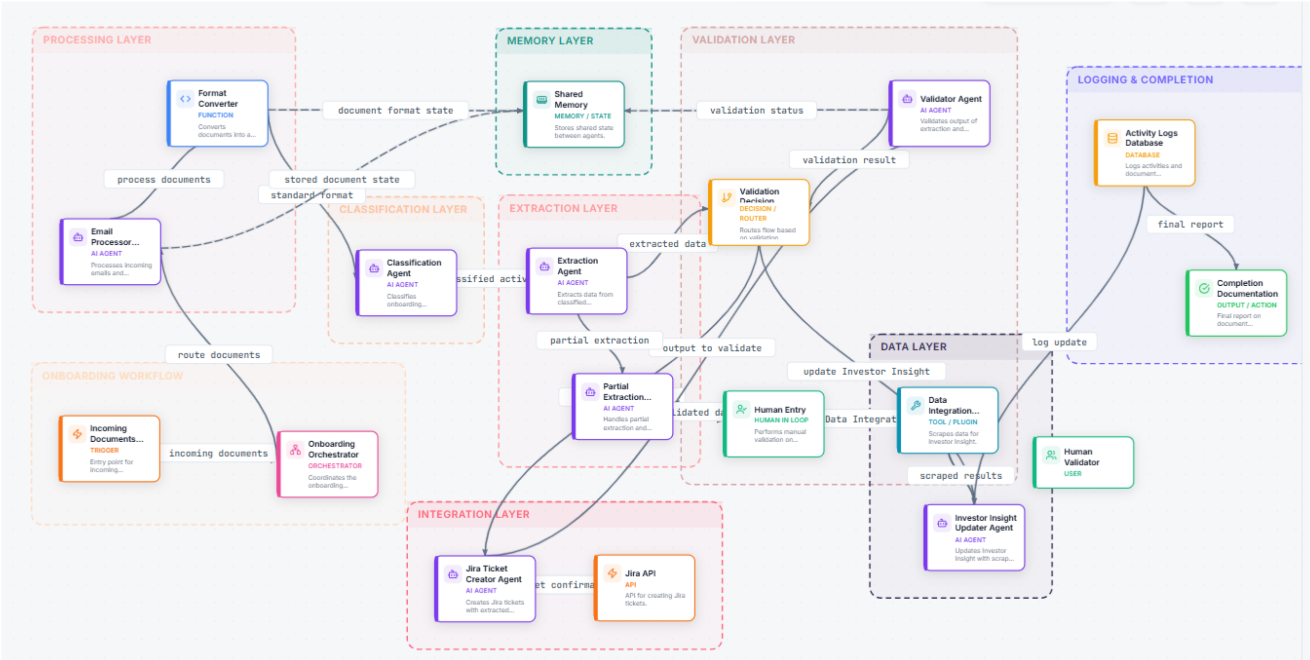


Current State Investor Services Onboarding
Client
Manual
Automated
Top 5 Opportunities
Investor Onboarding
Stages
Document Intake & Assignment
Document Consolidation & Review
Document Gathering
Onboarding Completion
Client/Investor
IS Analyst I
IS Analyst II/Supervisor
AML/Treasury Team
Send Onboarding documents via Email/FTP sites/Doc Libraries
Monitors Email/FTP sites/Doc Libraries for investor onboarding docs
Self-assign onboarding requests
Extract individual docs from consolidated doc file
Create shell transaction, populate initial fields (investor name, etc) & auto-creation of Jira ticket
Create Jira sub-task for AML/Treasury/FATCA team
Extract data entities & manually input into Investor Insight
Consolidates additional info needed from AML/Treasury/Onboarding team
Review and approve workdesk ticket to be shared with client
Sends consolidated request to client
Sends requested docs to onboarding analyst
Receive requested documentation from client
Extract additional data entities & manual input into investor insight
Sends to IS Analyst II for review
Complete review and approves
Complete onboarding and close Jira ticket
Addressed as part of other opportunities
Assigned to Jira sub-ticket
Updates Jira ticket with additional AML/Treasury/FATCA docs needed
Begins review & identifies additional documents needed
AML/Treasury/FATCA process complete



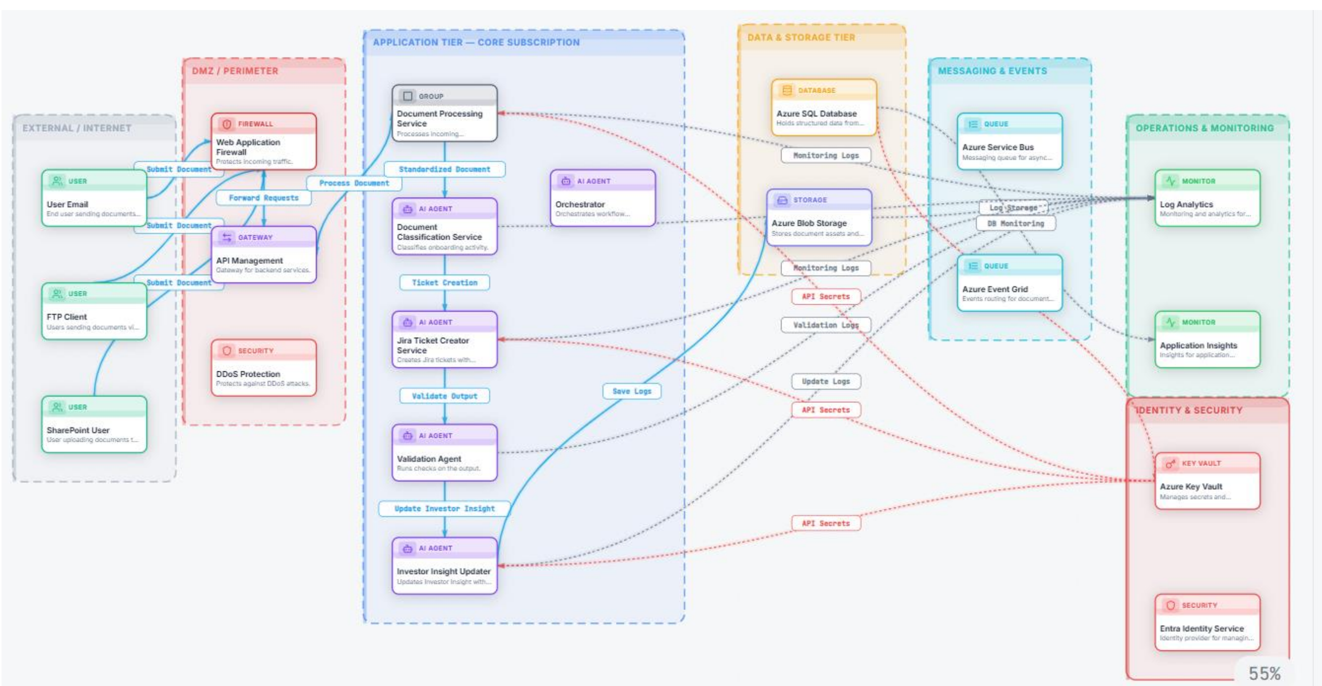
Future State Investor Services Onboarding
Client
Manual
Automated
Top 5 Opportunities
Investor Onboarding
Stages
Document Intake & Assignment
Document Consolidation & Review
Document Gathering
Onboarding Completion
Client/Investor
IS Analyst I
IS Analyst II/Supervisor
AML/Treasury Team
Send Onboarding documents via Email/FTP site/Doc repository
Monitors inbox for investor onboarding emails
Monitor FTP site/doc libraries
Self-assign onboarding requests
Extract individual docs from consolidated doc file
Create shell transaction, populate initial fields (investor name, etc) & auto-creation of Jira ticket
Create Jira sub-task for AML/Treasury/FATCA team
Extract data entities & manually input into Investor Insight
Consolidates additional info needed from AML/Treasury/Onboarding team
Review and approve workdesk ticket to be shared with client
Sends consolidated request to client
Sends requested docs to onboarding analyst
Receive requested documentation from client
Extract additional data entities & manual input into investor insight
Sends to IS Analyst II for review
Complete review and approves
Complete onboarding and close Jira ticket
Addressed as part of other opportunities
Assigned to Jira sub-ticket
Updates Jira ticket with additional AML/Treasury/FATCA docs needed
Begins review & identifies additional documents needed
AML/Treasury/FATCA process complete
1 Document Intelligence
2 Data Entry Agent
IBM & SEI PROPRIETARY & CONFIDENTIAL 75

Agent Flow Architecture:



Physical Architecture:

The solution will be built within SEI's Microsoft Azure environment. The solution will not communicate outside SEI's environment, and the data is entirely private to SEI.



Vendor shall prepare and deliver the following documents:

1. **Analysis Documentation –** User stories in templates aligned with SEI
2. **Solution Design Artifacts –** Detailed solution architecture in templates aligned with SEI
3. **Test Documentation –** Test approach, test case and test data related documentation in templates aligned with SEI
4. **Solution Deployment Documentation** - Deployment Documentation in templates aligned with SEI
5. **Operational Documentation –** N/A; Any updates to existing procedural documentation and change management related documentation will be handled by SEI, inclusive of playbooks and operating guides. Vendor will provide requisite vendor developed solution documentation to support SEI with updating relevant Operational Documentation.

All document deliverables will be reviewed and signed-off by SEI.

Pre-Production Delivery:

Pre-Production Environment: The environments used will be Dev, QA and UAT. Dev environment will be identified prior to development, and QA, UAT environments will be identified prior to development completion during execution. This will be environment where the code/automation will be moved, the systems of record validated for updates and sample sub documents processed for validation by the client.

Acceptance Test:

The UAT will be performed with the goal of measuring and validating 2 key criteria for the outputs:

1. Quality of the output of automation (eg: data extracted accurately from the docs)
2. Reduction in processing time through automation

Acceptance Criteria for each Deliverable:

1. Quality of output is not less than the current quality (error rates)
2. Processing time reduction of 25% or higher

Production Delivery:

Dependencies and SEI Internal Requirements

1. *Dependencies*

Dependency	Internal Stakeholder	Responsible Party	Estimated Time Period
Access to Outlook, JIRA, Investor Insight to the development team	Brad Landis	Zach Womack	Prior to 6/26
Sample documentation for in-scope clients (for each phase) across different document types	Brad Landis	Rob Bonanno	Prior to commencement of respective project phases
Alignment of Planned release schedules (if any) for JIRA and Investor Insight into the Implementation Plan	Brad Landis	IBM	Prior to deployment across all phases
Infrastructure set-up for development, UAT and production environments to build and deploy automations	Brad Landis	Zach Womack	Prior to commencement of respective project phases

2. *SEI Internal Requirements and Expected Timing*

Internal Process	Internal Stakeholder	Responsible Party	Estimated Time Period

Change Management including Procedure updates	Brad Landis	Rob Bonanno	Prior to deployment across all phases

Schedule 2

Fees

1. *Constant Costs*

The parties agree the following costs have been validated for calculation of both the SOW Transformation Value and the Gainshare Fees:

a. Annual In-Scope Constant Cost/FTE

Role	US
IS Analyst I	$ 62,000
IS Analyst II	$ 68,000
IS Supervisor	$ 85,000
IS Assistant Manager	$ 100,000
IS Manager	$ 119,000

b. Current Total In-Scope US Annual Spend *(Including Initial Onboarding + Additional Onboarding):*

The overall baseline cost is around 15% of the overall IS cost for the roles under consideration based on discussions with SEI.

Role	Annual FTE Capacity (US)	Average Cost US	Annual FTE Capacity (India)	Average Cost India	Total Cost
IS Analyst I	9.5	$ 62,000	5	$ 25,000	$ 714,000
IS Analyst II	10.5	$ 68,000			$ 714,000
IS Supervisor	2.6	$ 85,000			$ 221,000
IS Assistant Manager	1.9	$ 100,000			$ 190,000
IS Manager	1.5	$ 119,000			$ 178,500
Total					**$ 2,017,500**

i) Total Value Creation
ii) Increased Efficiency (reduction in processing time): Expected processing time reduction of 60% delivering $1,210,500 in annual savings.

2. *SEI Internal Enablement Costs*

The parties hereby agree that the internal SEI resource commitments and third-party expenditure required to procure under this SOW are expected to be a total of $75,000 which includes the following components:

- Annual Technology and Infrastructure Cost - $75,000 which includes but not limited to the following components:
    1. Azure Document Intelligence
    2. LLM Tokens
    3. Container Apps
    4. Storage (Blob and RDB)

3. *SOW Transformation Value Calculation Methodology*

For the purposes of this SOW, the following terms shall have the following meanings:

"*Total Annual Spend Reduction*" shall mean the Current Total In-Scope Annual Spend less the End State Total In-Scope Annual Spend set forth in Schedule 3.

"SOW Transformation Value "- The Total Annual Spend Reduction plus the Total Value Creation less the SEI Enablement Costs set forth below.

"End State Annual Spend" – means the sum of (the On-Shore Target In-Scope FTE for each Role set forth in Schedule 3 multiplied by the On-Shore Total In-Scope Annual Constant Cost/FTE for the applicable role) plus the sum of (the Off-Shore Target In-Scope FTE by Role set forth in Schedule 3 multiplied by the Off-Shore Total In-Scope Annual Constant Cost/FTE for the applicable role.

4. *SOW Transformation Value*

The parties hereby agree the Transformation Value for this SOW is $1,135,500 (the "**SOW Transformation Value**").

SOW Value Creation	$ 1,210,500
SEI Internal Enablement Costs (12 months)	$75,000
SOW Transformation Value	**$1,135,500**

5. *Gainshare Fees*

SEI hereby agrees to pay Vendor fees (the "Gainshare Fees**"**) estimated at $340,650 for, and Vendor agrees to perform, the Services set forth in Schedule 1. The estimated Gainshare Fees are calculated at 30% of the SOW Transformation Value for all phases listed in Section 6. Transformation Value and Gainshare Fees will be memorialized at Delivery Completion milestone and 70% of the Gainshare Fees will be paid to Vendor ("Initial Fee"). Actual Transformation value and Gainshare Fees will be memorialized at Validation milestone to reflect actual SOW Transformation Value and any remaining Gainshare Fees will be paid to the vendor ("Remaining Fee).

		Estimated Transformation Value	Demonstrated at Delivery Completion Milestone	Actual at Validation Milestone
Phase 1	Transformation Value	$ 499,620	TBC	TBC
	Gainshare Fees	$ 149,886	**TBC**	**TBC**
Phase 2	Transformation Value	$ 317,940	TBC	TBC
	Gainshare Fees	$ 95,382	**TBC**	**TBC**
Phase 3	Transformation Value	$ 317,940	TBC	TBC
	Gainshare Fees	$ 95,382	**TBC**	**TBC**
Total	Transformation Value	$ 1,135,500	TBC	TBC
	Gainshare Fees	$ 340,650	**TBC**	**TBC**

2 Payment Schedule

The parties agree that the Gainshare Fees shall be paid based on the payment schedule found in the table below:

	Estimated Initial Fee	**Anticipated Payment date**	**Estimated Remaining Fee**	**Anticipated Payment date**
Phase I (Initial 10 clients)	$104,920	9/4/2026	$44,966	12/4/2026
Phase II (10-50 clients)	$66,767	10/30/2026	$28,615	1/29/2027
Phase III (All remaining clients)	$66,767	1/22/2027	$28,615	4/23/2027

TOTAL	**$ 238,455**		**$102,195**	

The deployment will follow a 3-phased approach to cover all IS clients. Below is the list of clients for Phase I that covers ~44% of the total onboarding volume. The remaining clients for Phase II and Phase III will be identified during delivery of Phase I. The initial fees were calculated based on 44% of total volume being addressed in Phase I and remaining volume being addressed equally between phases II and III.

Client Name	New Subs/Commitments Volume	Phase
Client D	841	Ph I
Client E	312	Ph I
Client F	307	Ph I
Client C	1,364	Ph I
Client G	211	Ph I
Client H	1,778	Ph I
Client I	794	Ph I
Client A	526	Ph I
Client J	7,296	Ph I
Client K	496	Ph I
All other clients	18,075	Ph II, Ph III

Schedule 3
Measurement Metrics and Acceptance Testing

Measurement Metrics and Acceptance Criteria

The parties hereby agree that the following metrics will be the applicable measurement metrics (the "**Measurement Metrics**") for measurement purposes and demonstration that the Deliverable achieves the Target Measurement Metrics (as defined below) shall constitute the acceptance criteria and the criteria for Validation (the "**Acceptance Criteria**"). For the purposes of this SOW UC-11, "Onshore" shall mean the US and "Offshore" shall mean India.

Measurement Metrics

Processing Time – The amount of time spent performing the In-Scope Process in current state vs future state. Separate performance testing is not planned at this time. During UAT it will be determined that the solution does not cause any degradation in the performance of existing applications.

Baseline Measurement Metrics

The parties agree the following Measurement Metrics have been agreed and validated as the Baseline Measurement Metrics and will be the basis for calculation of both the SOW Transformation Value and the Gainshare Fees:

a. The Total current annual volume for Initial Onboarding = 32,000 for Initial Onboarding + 8000 for Additional Onboarding (~97.5% of the total effort is spent on Initial Onboarding)
b. Total annual US FTE capacity spent = 31
c. Average volume of Initial Onboarding requests processed per day = ~136 (32,000 at ~1880 hours per year)
d. Average volume of Additional Onboarding requests processed per day = ~34 (8,000 at ~1880 hours per year)
e. Average Current Processing time for 1 Initial Onboarding request = 90 minutes
f. Average Current Processing time for 1 Additional Onboarding request = 9 minutes
g.

Target Measurement Metrics

a. Target processing time for 1 Initial Onboarding requests (at 60% Transformation) = 36 minutes
b. Target processing time for 1 Additional Onboarding requests (60% Transformation) = 3.6 minutes

Testing Criteria/ Methodology

The parties hereby agree that for the purpose of the Measurement Metrics for calculation of BAU Measurement Metrics and Acceptance Testing, the following testing parameters shall apply. These criteria may evolve by joint agreement as the solution is developed:

Sample Criteria

1. Sample size - 136 Initial Onboarding requests and 34 Additional Onboarding requests
2. Samples will include Sub-Documents, SIF Documents and Tax Documents in proportions representative of the Production environment
3. Samples will include document examples from all clients for respective implementation phases

4. Ability to validate all input channels (emails, FTP sites, shared doc sites (eg: kiteworks)
5. Investor Insight and JIRA test environments available to validate E2E workflow (as required)

Quality Testing

a. The output of the document intelligence automation for fields extracted will have less than 5% error rate
b. Output for both Initial Onboarding and Additional Onboarding scenarios will be validated
c. Data entry into JIRA is complete and captures accurate description/comments

Processing Time testing

a. Initial enablement of users to interact with the automation at a comfortable level
b. 4 rounds of testing will be performed (average of 34 requests each round for Initial Onboarding and 8-9 requests for each round for Additional Onboarding) – average processing time will be calculated based on the time taken to execute the testing with IBM being side by side with SEI.

   (Depending on effort and transformation value, vendor and SEI may choose to build and validate processing time only for Initial Onboarding since it constitutes ~97.5% of the total current effort.)

Schedule 4

Termination Rights and Fees

In the event SEI elects to terminate this SOW, in whole or in part, for convenience before the end of the Term, SEI shall pay Vendor $ 400,000.

Schedule 5

Technology Tools and Existing IP

1. Pre-Existing IP:

a. SEI: None

b. Vendor: IBM will implement Docuflow/DIP (IBM pre-existing IP) in SEI's Microsoft Azure environment as part of the services in this SOW. IBM hereby grants SEI, a nonexclusive, irrevocable, worldwide license to use, execute, reproduce, display, perform and prepare derivatives of Docuflow/DIP for SOWs executed under the MSOW. This is deployed as code in SEI's environment that SEI has access to and can modify. Vendor can provide updates and assistance with that code in the future, as required.

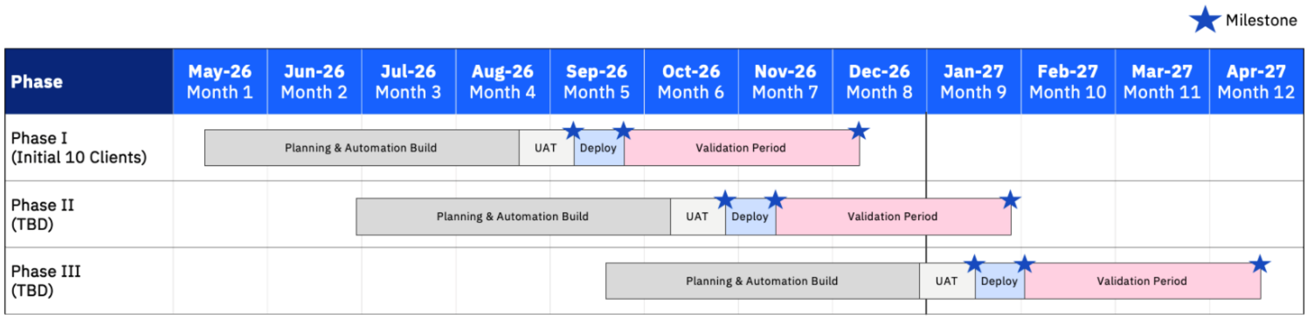
2. 2. Tech Tools

Category	Component	Requirement / Description
Application Layer	Azure App Service	Hosts web UI and REST APIs
	REST APIs	Enables integration with external and internal systems
	UI (Composer)	Used for configuration, monitoring, and human review
Compute & Orchestration	Azure Container Apps	Runs DocuFlow backend and multi-agent orchestration
	Azure Function Apps	Executes modular processing and integrations
	Agent Framework	Coordinates extraction, validation, and business rule agents
Data & Storage	Azure Blob Storage	Stores raw documents, outputs, and intermediate files
	Azure Storage Accounts	Supports orchestration state, logs, and training datasets
	Cosmos DB (Mongo API)	Stores prompts, configuration, and ontology definitions
	Azure AI Search (Vector DB)	Provides long-term memory and semantic search over documents
AI Services	Azure Document Intelligence	OCR, layout extraction, prebuilt document models
	Azure OpenAI	Extraction, enrichment, validation, and formatting using LLMs
	Cognitive Services	Additional NLP and AI capabilities
Security & Governance	Identity & Access	Azure Entra ID (RBAC) for user and system access
	Compliance	Azure Policy for governance and regulatory enforcement
	Auditability	Tracks corrections, validation, and processing actions
Resiliency	High Availability	Multi-region failover and resilient processing pipeline
	Data Persistence	Stores intermediate states and logs for recovery
Deployment	Environments	Dev, Test/_UAT, Prod with isolated resources
	Platform Model	Azure PaaS-based, scalable, event-driven architecture
	DevOps	GitHub (or other repo platform)

Appendix A

Implementation Plan (the "Implementation Plan")

The approvals and related controls for steps listed in the Implementation Plan will be aligned during Kick-off with SEI.



Step	Period/Scheduled Completion Date	Owner
User Stories completion	6/17/2026	IBM
Solution Design documentation and validation	6/17/2026	IBM
Test Approach, Test Data and Test Case Completion for all phases	6/19/2026	IBM
Ph I - Build and Configure	8/21/2026	IBM
Ph I - Move to Pre-Production	8/21/2026	IBM
Ph I - UAT Completion	9/4/2026	IBM / SEI
Ph I - Production Change Control	9/11/2026	SEI
Ph I - Production Deployment	9/11/2026	SEI
Ph I - Hypercare/Post-Implementation Support	9/25/2026	IBM
Ph II – Build and Configure	10/16/2026	IBM
Ph II – Move to Pre-Production	10/16/2026	IBM
Ph II – UAT completion	10/30/2026	IBM/SEI
Ph II - Production Change Control	11/06/2026	SEI
Ph II Production Deployment	11/06/2026	SEI
Ph II – Hypercare/Post-Implementation Support	11/20/2026	IBM

Ph I - Validation Period	12/4/2026	SEI
Ph III – Build and Configure	1/8/2026	IBM
Ph III – Move to Pre-Production	1/8/2026	IBM
Ph III – UAT completion	1/22/2027	IBM/SEI
Ph III - Production Change Control completion	1/29/2027	SEI
Ph III - Production Deployment	1/29/2027	SEI
Ph II – Validation Period	2/5/2027	SEI
Ph III – Hypercare/Post-Implementation Support	2/12/2027	IBM
Ph III – Validation Period	4/23/2027	SEI

Sample Documentation Request Requirements:

SEI will use commercially reasonable efforts to provide sample data according to the requirements and timelines mentioned in the table below, for Vendor to be able to adequately perform the anticipated Build and Configure activities in the Implementation Plan. The sample documentation will be scrubbed of all personally identifiable information according to SEI requirements.

Category	Subcategory	Client	Date Required for 5 examples (digital) and 5 examples (handwritten)	Date Required for 5+ examples (digital) and 5+ examples (handwritten)
CRS Form Self-Cert	Entity	Does not have to be client specific	6/25/26	7/10/26
	Individual	Does not have to be client specific	6/25/26	7/10/26
SIF Document	N/A	Client C	7/1/26	7/10/26
Subscription Document	N/A	Client D	7/3/26	7/10/26
		Client E	7/3/26	7/10/26
		Client F	7/3/26	7/10/26
		Client G	7/3/26	7/10/26
